### 8.2 Engineering Controls:

#### Local Ventilation:
Recommended.

#### General Ventilation:
Recommended.

### 8.3 Personal Protective Equipment for Routine Handling

#### Respiratory protection:
When respirators are required, select NIOSH/MSHA approved equipment based on actual or potential airborne concentrations and in accordance with the appropriate regulatory standards and/or industrial recommendations. For reasonably foreseeable industrial end uses of this material, respiratory protection should not be necessary.

#### Eye protection:
Eye and face protection requirements will vary dependent upon work environment conditions and material handling practices. Appropriate ANSI Z87 approved equipment should be selected for the particular use intended for this material. Eye contact should be prevented through use of chemical safety glasses with side shields or splash proof goggles. An emergency eye wash must be readily accessible to the work area.

#### Hand protection:
Skin contact should be minimized through use of gloves and suitable long-sleeved clothing (i.e., shirts and pants). Consideration must be given both to durability as well as permeation resistance.

#### Clothing Requirements:
Uniforms, coveralls, or a lab coat should be worn.

#### Change/Removal Of Clothing:
Remove contaminated clothing and launder before reuse.

#### Wash Requirements:
